Advanced Leadership and Management Development Course

SUMMARY

I am a Full Stack Software Engineer who values community, team building, and am ever striving to set higher standards for myself and my peers. I approach all tasks with inherent resiliency and vision for a steady tempo of progress towards the finished product.

HIGHLIGHTED PROJECTS

PARKVISION

JAVASCRIPT | HTML | CSS | AXIOS

Here you can retrieve and display park data from New York state parks. The user also has the ability to search for state parks anywhere in the country.

SONDAR

JAVASCRIPT | HTML | CSS | AXIOS | REACT

This project uses an IP geolocation API and the YELP API to provide the user with 20 restaurant's in their immediate area (in up to 32 different countries). Additionally, the user can search for restaurants anywhere they want by providing the required search criteria. It features a pop up search bar when the user hits a certain point while scrolling.

UNDISCLOSED

JAVASCRIPT | HTML | CSS | AXIOS | REACT | EXPRESS | POSTGRESQL

The idea behind this project is to allow users to create an account on a website that allows them to post blogs exclusively about locations unknown to most citizens or visitors of their city. Users can create, update, or delete blogs as well as update their profile image and city. This project was completed as a team effort.

ABOOK

JAVASCRIPT | HTML | CSS | AXIOS | REACT | RAILS | ACTIVE RECORD

Register and log into your account to be able to create a list of books that you want to read providing a cover image, author's name, and book title. Add notes to your books and when you're done reading click the finished button to move to the "completed ones" section.

WORK EXPERIENCE

GENERAL ASSEMBLY, NEW YORK, NY – SOFTWARE ENGINEERING IMMERSIVE FELLOW

September 2019 - December 2019

- Collaborated with a UX Design team to improve the user interface of a British county fair promotion and information website.
- Developed full CRUD applications under strict deadlines and pushed them to surge and Heroku.
- Proficient with chrome developer tools, Javascript debugger, and Ruby byebug for code debugging.

U.S. ARMY, FORT BRAGG, NC – STAFF SERGEANT

July 2011 - November 2018

- Effectively maintained a company excel sheet tracking individual personnel equipment resulting in 110 personnel avoiding owing money to the U.S. Army.
- Recommended modification of the company equipment allocation procedure resulting in the improved maintenance of equipment and prolonging the life of \$40,000 worth of company equipment.
- Successfully Trained other Team leaders on proper employee performance appraisal techniques and established a standard operating procedure for performance appraisal within my department.
